Experience

DEC 2024 - PRESENT

Career break (health), now fully available – Building data analytics portfolio projects using SQL Server and Power BI, and completing an IT Specialist in Python qualification (Cenit College).

MARCH 2017 - DECEMBER 2024

Aryza (Financial Services SaaS) | Dublin, Ireland

Interim Reporting Team Manager | May 2023 - January 2024

- Led a team of 3 data analysts and was responsible for allocating work, prioritising the report backlog and reviewing output before it reached customers.
- Ran daily stand-ups to clear blockers and keep customer deliverables on schedule.
- Acted as the escalation point for customer reporting issues and reported to senior stakeholders on team delivery and performance.

MARCH 2017 - DECEMBER 2024

Senior Data Analyst | Dublin, Ireland

- Designed and optimised complex SQL queries and stored procedures, **reducing query execution time** by over **87% (from 4 minutes to under 30 seconds)** and improving reporting performance.
- Automated daily reporting processes by replacing manual calculations with report-based outputs, **reducing reporting effort by 50%** and improving operational efficiency.
- Developed and maintained **100+ Power BI dashboards and SSRS reports**, delivering business-critical reporting solutions supporting **40+ customers** across multiple operational teams.
- Served as the primary BI and reporting subject matter expert across customer projects, owning technical decisions, defining deliverables, estimating implementation timelines and coordinating BI workstreams with development, product and business teams.

- Managed the end-to-end BI reporting lifecycle, from customer requirements gathering and technical specifications through to solution design, SQL development, quality assurance, deployment and ongoing support.
- Configured, deployed and monitored Power BI and SSRS reporting environments, ensuring reliable access to reporting solutions and providing ongoing technical support.
- Engaged directly with customers and senior stakeholders to understand business challenges, present analytical findings and recommend reporting solutions that supported informed decision-making.
- Developed executive reporting solutions integrating data from multiple systems, providing senior leadership with visibility into financial and operational KPIs to support strategic planning and board-level reporting.

Projects

Customer Migration & Reporting Transformation

- Coordinated the migration and redevelopment of *100+ enterprise SSRS reports* for a major customer, managing delivery timelines, cross-functional testing and reporting continuity across **7–8 operational teams** and senior leadership, with zero business downtime.
- Translated legacy SQL queries and Visual Basic logic into updated formats aligned with the new data architecture.
- Contributed to a rigorous QA process, ensuring data integrity and reporting accuracy post-migration.

Customer Journey Analytics & Conversion Optimisation

- Designed and developed a customer journey analytics dashboard to track user progression through a digital repayment agreement sign-up process, identifying conversion rates and drop-off points at each stage.
- Analysed customer behaviour to identify friction points and presented actionable insights to product teams, informing improvements to customer communications and application content.
- Supported data-driven optimisation initiatives, with selected content changes associated with conversion rate improvements of **up to 40%.**

Education & Professional Development

SEPTEMBER 2012 - NOVEMBER 2018

Bachelor of Science (Hons) in Enterprise Computing | Dublin City University | Dublin, Ireland

Professional Development

- 20461 Querying Microsoft SQL Server ---- Nexus Human | August 2017
