Business: Stakeholder Management, Consultative Customer Engagement, Executive Reporting, Requirements Gathering, Cross-functional Collaboration (Sales and Customer Success), Prioritisation, Business Process Improvement, Project Management, Executive Communication, Presentation Skills, Business Acumen, Problem Solving

EXPERIENCE

Career Break | December 2024 – Present

- Building data analytics portfolio projects using SQL Server and Power BI, including analysis of Dublin government data and a football analytics project, and completing an IT Specialist in Python qualification (Cenit College).

Senior Data Analyst | Aryza (Financial Services SaaS), Dublin, Ireland | March 2017 – December 2024

- Served as a trusted analytical consultant to 40+ enterprise customers, partnering directly with operational managers, senior leadership and directors to understand business challenges, deliver tailored analytical solutions, and present evidence-based recommendations that influenced business decisions.
- Partnered with **Sales and Customer Success teams** to analyse customer revenue, engagement and operational activity, developing Salesforce-integrated dashboards and contributing to a customer grading framework that enabled data-driven account prioritisation.
- Developed executive reporting solutions integrating data from multiple systems, giving senior leadership visibility of financial and operational KPIs to support strategic planning and board-level reporting.
- Developed and maintained **100+ Power BI dashboards and SSRS reports** supporting **40+ customers** across multiple operational teams.
- Served as the primary BI and reporting subject matter expert, owning technical decisions, defining deliverables, estimating timelines and coordinating workstreams with development, product and business teams across the full reporting lifecycle: requirements, specification, solution design, SQL development, QA, deployment and support.
- Used **AI tools** to speed up delivery: ChatGPT for query creation and bug-fixing in stored procedures, and Microsoft Fabric Copilot to help build DAX measures in Power BI.

- Partnered with senior leadership, including the **CFO**, to define strategic reporting requirements, analyse financial and operational performance, and translate complex data into clear, actionable insights supporting executive decision-making and strategic planning.
- Optimised complex SQL queries and stored procedures, **reducing query execution time by over 87% (from 4 minutes to under 30 seconds)**, and automated daily reporting by replacing manual calculations with report-based outputs, **reducing reporting effort by 50%**.

Interim Reporting Team Manager | Aryza | May 2023 – January 2024

- Led a team of **3 data analysts**, allocating work, prioritising the report backlog and reviewing output before it reached customers.
- Ran daily stand-ups to clear blockers and keep customer deliverables on schedule.
- Mentored junior members of the team, providing additional support and training where applicable to assist in the upskilling of the team.
- Acted as the escalation point for customer reporting issues and reported to senior stakeholders on team delivery and performance.

SELECTED PROJECTS (ARYZA)

Customer Journey Analytics and Conversion Optimisation

- Analysed customer progression through a digital repayment agreement journey, using SQL and Power BI to monitor completion rates, identify significant drop-off points and uncover potential system issues.
- Presented findings and actionable recommendations directly to the Product team, highlighting areas of customer friction and influencing improvements to application content, customer communications and the overall user journey.
- Monitored customer completion rates before and after Product team improvements, evaluating the impact of changes informed by analytical findings, with selected changes associated with relative completion rate improvements of up to **40%**.

Customer Migration and Reporting Transformation

- Coordinated the migration and redevelopment of **100+ enterprise SSRS reports** for a major customer across **7–8 operational teams** and senior leadership, managing timelines and cross-functional testing with zero business downtime.
- Translated legacy SQL queries and Visual Basic logic to the new data architecture and contributed to QA, ensuring data integrity and reporting accuracy post-migration

EDUCATION AND PROFESSIONAL DEVELOPMENT

BSc (Hons) in Enterprise Computing | Dublin City University, Dublin, Ireland | September 2012 – November 2018

Querying Microsoft SQL Server (20461) | Nexus Human | August 2017
Analysing Data with Power BI (20778) | Nexus Human | April 2019
IT Specialist in Python | Cenit College | In progress

INTERESTS

Football and GAA, live music, and volunteering as a coach with a local football club’s academy.
