Experience

MARCH 2025 - JANUARY 2026

Career Break (Medical Recovery) -- Medical recovery; fully recovered and available for full-time employment.

MARCH 2017 - DECEMBER 2024

Senior Data Analyst | Aryza (Financial Services SaaS) | Dublin, Ireland

- Partnered with Sales and Customer Success leadership to develop performance reporting, pipeline insights and quarterly business reviews supporting commercial planning and executive reporting from data obtained from Salesforce.
- Partnered with senior business leaders to identify strategic priorities, translate business challenges into analytical solutions and deliver reporting that informed operational and commercial decision-making.
- Designed and optimised SQL queries and stored procedures to extract and process large datasets, improving reporting performance and data accessibility.
- Built and presented executive dashboards to senior leadership, walking stakeholders through key metrics and trade-offs to support data-driven operational decisions.
- Identified system bugs through data, managing technical escalations by conducting root cause analysis on the affected data and collaborating with both development and product teams to deploy system fixes.
- Monitored user behavior and performance metrics across various products to identify emerging trends, anomalies, and operational risks, providing data-driven recommendations to product managers that improved decision-making.

OCTOBER 2013 - MARCH 2017

Sales Assistant | Ticketron | Dublin, Ireland

- Provided customer-facing sales support for high-demand events, handling large transaction volumes in fast-paced environments.
- Managed ticket sales for major events across Ireland and the UK via Ticketmaster systems.
- Delivered strong customer service while managing high-pressure situations during major ticket releases.

Projects

Customer Migration & Reporting Transformation

- Defined delivery timelines, managed scope, and coordinated cross-functional testing across legacy and target systems to transition 100+ enterprise reports with zero business downtime.
- Rebuilt a suite of **100+** SSRS reports, ensuring compatibility and performance within the new system environment.
- Translated legacy SQL queries and Visual Basic logic into updated formats aligned with the new data architecture.
- Contributed to a rigorous QA process, ensuring data integrity and reporting accuracy post-migration.

Business Performance Analytics & Executive Dashboard Development

- Led end-to-end implementation of an executive reporting suite, creating unified reporting across disparate SQL environments to drive board-level strategy and funding decisions
- Integrated data from multiple systems using SQL and MySQL to create a unified reporting layer.
- Delivered insights on key metrics including arrears, cashflow, completion rates, and case performance.
- Enabled stakeholders to use data-driven insights to support funding discussions and strategic planning

Education

SEPTEMBER 2012 - NOVEMBER 2018

Bachelor of Science (Hons) in Enterprise Computing | Dublin City University | Dublin Ireland

Interests

- Sports including football & GAA
- Listening to music and attending live shows
- Volunteering as a coach with the local football club's football academy
